do forever {
    wait for the sensor to be tripped;
    turn on power to the door motor;
    wait for a signal that indicates the door is open;
    wait for the sensor to reset;
    delay ten seconds;
    turn off power to the door motor;
}

Figure 4.4 Example of the steps a microcontroller performs. In most cases, microcontrollers are dedicated to trivial control tasks.
